Jurnal Modul 12

1. Initialize project dan push

```
D:\KULIAH\SEMESTER 4\KPL_Praktikum\laporan_github git:(master)±3 (0.155s)
git add 12_Performance_Analysis_Unit_Testing_dan_Debugging/jurnal/

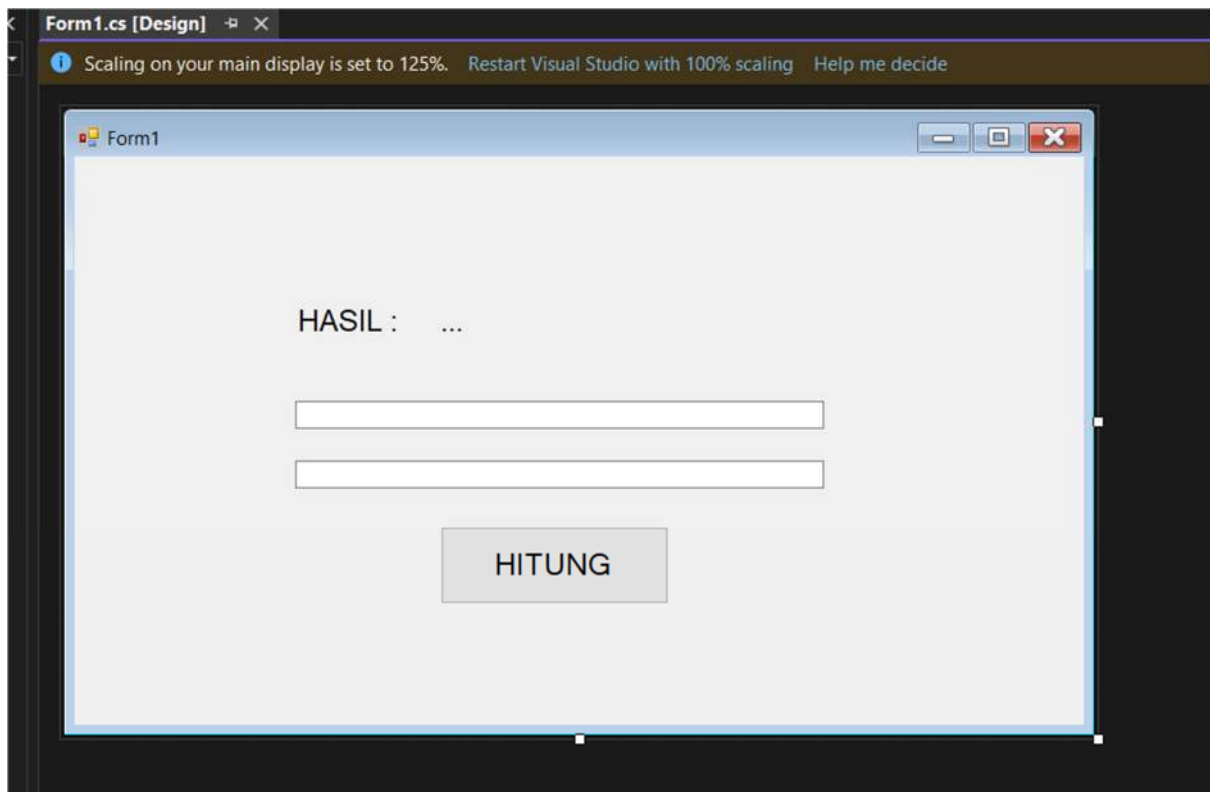

D:\KULIAH\SEMESTER 4\KPL_Praktikum\laporan_github git:(master)±13 (0.171s)
git commit -m "jurnal 12 : initialize project"
[master 48b66d9] jurnal 12 : initialize project

```

Creating project "modul12_2311104057" - project creation successful.

2. Membuat GUI

3. Membuat function untuk mencari nilai pangkat

```

6
7 namespace modul12_2311104057
8 {
9     1 reference
10    public class Utilities
11    {
12        0 references
13        public static int CariNilaiPangkat(int a, int b)
14        {
15            if (b == 0)
16                return 1;
17            if (b < 0)
18                return -1;
19            if (b > 10 || a > 100)
20                return -2;
21
22            try
23            {
24                checked
25                {
26                    int hasil = 1;
27                    for (int i = 1; i <= b; i++)
28                    {
29                        hasil *= a;
30                    }
31                    return hasil;
32                }
33            }
34            catch (OverflowException)
35            {
36                return -3;
37            }
38        }
39    }
40 }

```

Dibuat di class berbeda untuk mempermudah unittest dan meningkatkan modularity

4. Implementasi untuk button click

```
10
11 namespace modul12_2311104057
12 {
13     3 references
14     public partial class Form1: Form
15     {
16         1 reference
17         public Form1()
18         {
19             InitializeComponent();
20         }
21
22         1 reference
23         private void buttonHitung_Click(object sender, EventArgs e)
24         {
25             try
26             {
27                 int a = int.Parse(textBoxA.Text);
28                 int b = int.Parse(textBoxB.Text);
29                 int hasil = Utilities.CariNilaiPangkat(a, b);
30                 labelOutput.Text = $"Hasil: {hasil}";
31             }
32             catch (Exception ex)
33             {
34                 labelOutput.Text = "Input tidak valid";
35             }
36         }
37     }
38 }
```

5. Memory Profiling

Memory Usage

CPU Usage

View Heap

	ID	Time	Objects (Diff)	Heap Size (Diff)	Label	
	1	11.36s	2.398 (n/a)	191,52 KB (n/a)		
	2	46.22s	2.425 (+27 ↑)	192,23 KB (+0,70 KB ↑)		
	3	55.23s	2.432 (+7 ↑)	192,54 KB (+0,31 KB ↑)		
	4	67.82s	2.432 (+0)	192,54 KB (+0,00 KB)		
	5	87.75s	2.432 (+0)	192,54 KB (+0,00 KB)		
	6	99.67s	2.539 (+107 ↑)	201,56 KB (+9,02 KB ↑)		

6. CPU Profiling

CPU startup app

```
Time: 604,08ms
Value: 14 % of all processors
Profiling Enabled
```

CPU typing

CPU 3 pangkat 19

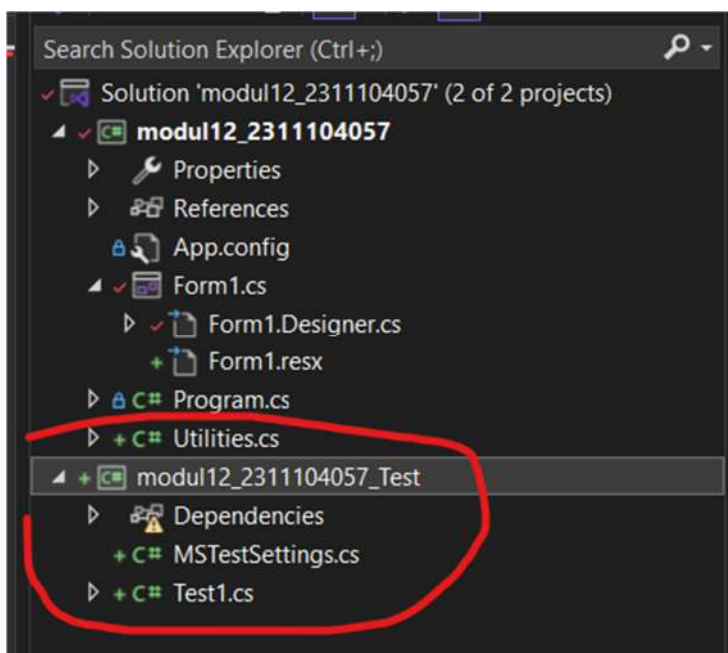

CPU 9 pangkat 30

CPU format exception

7. Membuat unit test

9. Menambahkan unittest

```
