Tugas Pendahuluan Modul 12

1. Initialize project dan membuat GUI

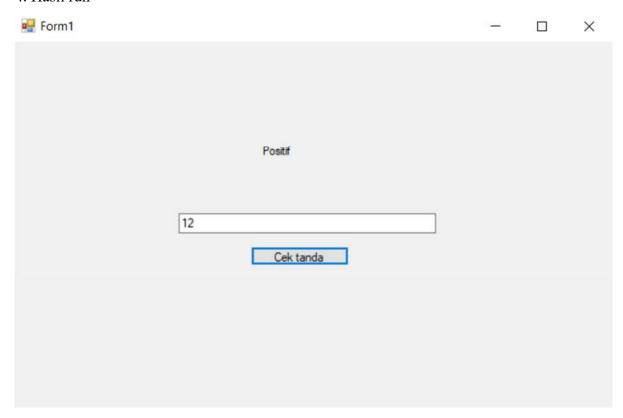

2. Membuat fungsi untuk mencari tanda bilangan

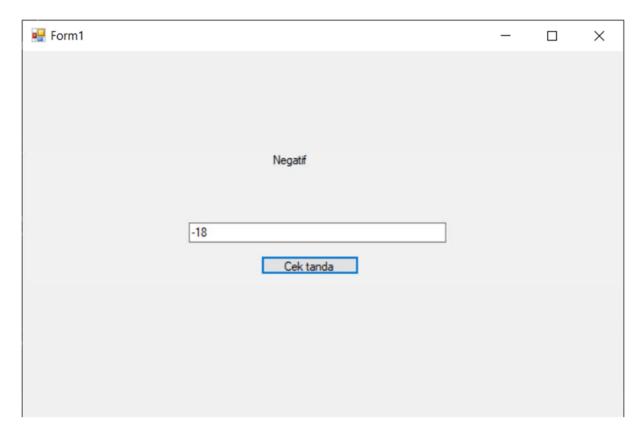

```
1 reference
private string CariTandaBilangan(int a)
{
    if (a < 0)
        return "Negatif";
    else if (a > 0)
        return "Positif";
    else
        return "Nol";
}
```

3. Implementasi ke button click

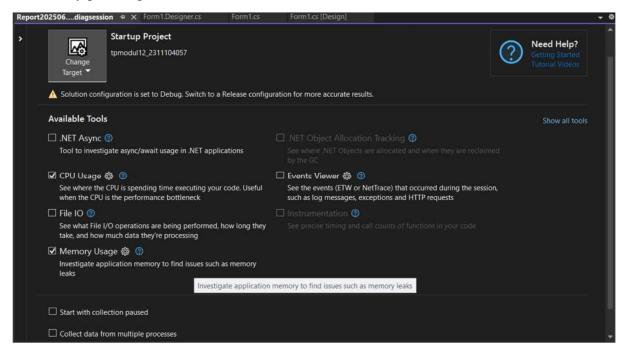

```
private void checkButton_Click(object sender, EventArgs e)
    if (int.TryParse(inputTextBox.Text, out int number))
    {
       resultLabel.Text = CariTandaBilangan(number);
    }
    else
    {
        try
        {
            // Attempt to parse the input to check for overflow
           Convert.ToInt32(inputTextBox.Text);
        catch (OverflowException)
            MessageBox.Show("Bilangan terlalu besar atau kecil untuk tipe data intege
            resultLabel.Text = string.Empty;
            return;
        catch (FormatException)
            MessageBox.Show("Input tidak valid. Silakan masukkan bilangan bulat.", "I
            resultLabel.Text = string.Empty;
            return;
```
